Attention Moshe Fraind

Thank you once again for sending the ActiVessel device to our facility We have been using the device for just 2 weeks but have had excellent results with our patients. We have been able to expand our services with our carpal tunnel patients to plantar fasciitis and shoulder tendonitis patients with excellent results. I have spoken to you about a testimonial of a patient I am seeing that had limited hand mobility but immediately after treatment, she was able to full close her hand and perform squeezing activities that she was unable to do for over a month. Dr. Mike Morgenstern, a semi retired orthopedic surgeon had one treatment in his hands due to neuropathy and he had improved sensation for several days. We are very optimistic that ActiVessel will be a difference make in our clinic

Upon review of CPT charges based on time codes of 2 units of ultrasound and or neuromuscular activity, our commercial payors with BCBS will pay us over \$60. There are some variance based on insurer type but otherwise I am satisfied with the reimbursement for time well spent

Sincerely

Jim Judge PT, MOMT
